1. *Statistics Canada's population estimates, components of change and age groups are 2006 Census-based adjusted for net undercoverage.*
2. *Except for Canada, projections are produced by the Ontario Ministry of Finance (Spring 2012). Projections for Canada are from Statistics Canada (based on 2006 Census).*
3. *Total dependency ratio is the ratio of the population aged 0–19 and 65+ to the population aged 20-64.*
4. *Total Fertility Rates and life expectancy estimates are for calendar year, and projections are for census year. Life expectancy estimates for years after 2005 represent three-year averages (e.g., 2008 reported life expectancy corresponds to the average recorded over 2007-2009).*
5. *Families and households are Census data.*
6. *In the "Components of Change" table, flows are for the 12-month period July 1 to June 30. Net international migration is calculated as the net balance of immigrants, net emigrants and net non-permanent residents (NPRs).*

Note: All population figures are for July 1st.
